REGZA ADI TIRTA

ELECTRONICS INDUSTRIAL ENGINEERING

Microcontrollers • Pneumatics • PLC • Relay Systems • Mobile Robotics

regzaaditirta@gmail.com | 0895-2292-7594 | SMK Warga Surakarta

PROFILE

Electronics Industrial Engineering (SMK Warga Surakarta) who learns by building with microcontrollers, pneumatic systems, PLCs and relay control circuits, with mobile robotics experience. Strong academic performer with working knowledge of programming, some public speaking experience, and has built an AI agent with LiveKit.

EDUCATION

SMK Warga Surakarta – Electronics Industrial Engineering
Strong academic performance

TECHNICAL SKILLS

Control & Automation	PLC • Relay systems • Pneumatics
Embedded & Robotics	Microcontrollers • Mobile robotics
Programming	Decent knowledge of programming and coding • AI agent development with LiveKit

SOFTWARE & TOOLS

Pneumatic Simulation	**FluidSIM-P** (strong proficiency)
Circuit Design	Proteus • KiCad • Eagle
Mechanical CAD	SolidWorks
Microcontroller IDE	Arduino IDE

EXPERIENCE & PROJECTS

- **Mobile robotics** – mobile robotics experience, supported by microcontroller, control and electronics skills.
- **AI agent (LiveKit)** – built an AI agent using the LiveKit platform.

STRENGTHS

I consider problem-solving and persistence to be two of my strongest qualities. I like challenging technical problems because they force me to think differently and keep experimenting until I understand the solution. I also value curiosity, independent learning, hands-on experimentation, teamwork, adaptability, and helping others whenever I can.

Also: strong academic performance • some public speaking experience

INTERESTS

Outside academics, I have a wide range of interests. I enjoy programming and hardware exploration, but I also like gaming, especially challenging Souls-like and story-driven games. I enjoy going to the gym, swimming, cycling, running, and cooking.
